CALFIRE supply to trade accounts all over the Country, however members of the public are welcome to browse through this catalogue or visit the companies website at www.calfire.com. Contact with the company can be made through an email facility where product information or details of local stockists can be ascertained.

Alternatively contact your stockist or telephone our friendly staff on **01691 772922**

Please note that specified finishes such as Brass, Antique, Chrome, Pewter, Copper, Copper Bronze & Steel relate to the colour only and not the material.

Throughout pages 3-70 of this catalogue, British Manufactured items are clearly indicated with the union flag for your information.

Fireside Products listed in this catalogue are either manufactured using Mild Steel and or Cast Iron.

Due to studio lighting and printing inks, the colours shown in this catalogue may differ slightly from those of the actual products. Any dimensions or weights given are approximate and should only be used as a guide. Key to dimensions: H=Height; D=Depth; W=Width; L=Length. Calfire's aim is one of constant improvement and the company reserves the right to change specifications without written notice. Reproduction of the photographs in this catalogue is prohibited without the prior written permission from Calfire Ltd.

Flue & Chimney Cleaner

13018 750g (Box of 6)

Flue free helps to maintain clean chimneys for maximum efficiency, lower fuel costs and a reduced risk of fire.

Stove & Grate Polish

13019 170g (Box of 6)

A water based graphite polish suitable for wood/coal stoves, grates and surrounds

Slate Oil

13020 100ml (Box of 6)

Seals and protects slate, enhancing it's natural beauty, repelling dirt and water whilst allowing the slate to breathe.

Coal Paint

04039 400ml (Box of 6)

Rejuvenating or adding a decorative finish to ceramic coals.

Stove Glass & Vitreous Enamel Cleaner

13009 500ml (Box of 6)

Removes the toughest tar, soot and creosote stains from stove window glass.

Fireplace Cleaner

13012 500ml (Box of 6)

Removes stains from Stone, Brick and Concrete.

Slate Sheen

13017 500ml (Box of 6)

Seals and protects slate, enhancing its natural beauty, repelling dirt and water whilst allowing the slate to breathe.

Spray-on Stove Glass Cleaner

13011 500ml (Box of 6)

Removes the toughest tar, soot and creosote stains from stove window glass.

Super Silicone

13004 80ml

Silicone Sealant for use where good adhesion and a flexible bond is required, with a high temperature resistance to 300c.

Used to secure thermal rope/tape and ceramic fibre seal.

Super Seal

13002 100ml (Box of 6) **13001** 30ml

13003 500ml (Box of 6)

A High temperature adhesive used to secure thermal rope/tape and ceramic fibre seal.

Peek

Peek Cream Polish

13600 100ml

Peek is a 4-in-1 cleaner that cleans, polishes, restores and protects 38 surfaces including brass, copper, stainless steel, silver, gold, chrome, fibreglass, ceramics, glass, acrylics and painted surfaces.

Stove & Grate Polish

**13504** 170g (Box of 6)

A water based graphite polish suitable for wood/coal stoves, grates and surrounds

Black Stove & Grate Polish

**13503** 75ml tube (Box of 6)

A water based graphite polish suitable for wood/coal stoves, grates and surrounds

Multi-use Metal Polish

**13512** 150ml tube (Box of 6)

A very effective polish for use on copper, brass, nickel, pewter, chrome and gold. Multi-use metal polish gives a cleaner, more protective, longer lasting shine

Lint Free Cloths

NEW

**13519** 300 x 300mm Cloths (Pack of 3)

Machine washable lint cloths. Ideal for use applying products such as cleaners, polishes and oils.

Glass Cleaner

**13506** 320ml aerosol (Box of 6)

A Foaming formula that will stick to vertical surfaces to dissolve smoke stains and tar/creosote deposits.

Spray-on Glass Cleaner

**13517** 750ml spray (Box of 6)

This cleaner clings to vertical surfaces to dissolve smoke stains and tar/creosote deposits.

Fireplace Cleaner

**13510** 500ml (Box of 6)

Uses Oxygen based bleaching action to remove smoke, soot and tar stains from stone, concrete, marble and other hard surfaces.

Brick & Stone Sealer

**13511** 500ml (Box of 6)

A special formulation that makes the surface of natural brick and stone strongly repellent to oil, water dirt and dust.

Slate Oil

**13515** 100ml (Box of 6)

Seals and protects slate, enhancing it's natural beauty, repelling dirt and water whilst allowing the slate to breath.

Coal Paint

**13516** 300ml aerosol (Box of 6)

An high temperature paint for applying a decorative finish to new or for rejuvenating old, ceramic coals.

Xylene Thinners

NEW

13518 125ml (Box of 6)

Ideal for use with Stove Bright HT paint. Xylene thinners can be used to clean surfaces, clean brushes and any other equipment that has been used with oil based paints.

Flue Free Chimney Cleaner

**13500** 750g (Box of 6)

Flue free helps to maintain clean chimneys for maximum efficiency, lower fuel costs and a reduced risk of fire. Now non corrosive to Stainless Steel.

Stove Glass Panels, Strips & Mica

Panels

Calfire Panels are manufactured from the finest quality Schott Robax® zerothermal expansion rated ceramic glass. Sizes are available from stock for all leading stoves and our in-house cutting facility means any size and shape can be quickly supplied to order

Curved Panels

We now stock a selection of curved panels for some popular stoves. Please refer to our price list for more details.

Mica

Ready cut stove panels and standard sheets are available

Strips

Replacement Strips are supplied from the highest quality flat borofloat sheet.

Calfire have Strips to suit the majority of stoves on the market and can supply specials with a rapid response guaranteed.

Calfire hold in stock standard size glass for all popular stove manufacturers

We recommend when replacing new glass panels to also replace the thermal rope seal.

Please refer to pages 6 & 7

A dry glass cleaner specifically developed by Schott Robax® for cleaning ceramic glass panels.

FiAir Air Blower

14129

FiAir Air Blower

The FiAir is a hand held battery powered fan used to speed up the blaze of your open fire, stove or barbeque. Now a cozy fireside is just two minutes away as the FiAir kindles wood to a robust blaze in two minutes or less and keeps it that way with a few well-placed bursts of life-giving air each time you add more fuel. This compact, portable, hand-held device uses 3 x AAA batteries (not included)

14160

Cal-Vent Draught Excluder DR21

The air vent is designed to reduce, or even eliminate, the draught these vents cause when the fire is not lit. A must in homes exposed to strong winds or turbulent air. Can be retro fitted to a 4" or 5" existing hole easily.

Ecofan ULTRAIR

The Caframo UltraAir Ecofan 810 is a heat-powered fan designed to circulate the warm air created by a wood-stove operating with normal surface temperatures of between 100°C and 345°C. The UltraAir 810 Ecofan generates up to 125 Cubic Feet (of Air) per Minute. (At 100°C the UltraAir Ecofan 810 will move 50 CFM)

Dims: Base Plate W12.1 D7.6cm (4.75x3").
H22.2cm (8.75") from base to top of casting, excluding handle. Blade diameter 20.6cm (8")

E810BB

Ecofan ORIGINAL

The Caframo Original Ecofan 800 is a heat-powered fan designed to circulate the warm air created by a wood-stove operating with normal surface temperatures of between 110°C and 345°C. The Original Ecofan 800 generates up to 100 Cubic Feet (of Air) per Minute. (At 110°C the Original Ecofan 800 will move 50 CFM)

Dims: Base Plate W10 D7.5cm (4x3").
H23.5cm (9.25") from base to top of blade, excluding handle. Blade diameter 20.5cm (8")

E800BB

Ecofan ORIGINAL MINI

The Caframo Original Mini Ecofan 815 is a heat-powered fan designed to circulate the warm air created by a wood-stove operating with normal surface temperatures of between 110°C and 345°C. The Original 815 Mini Ecofan generates up to 85* Cubic Feet (of Air) per Minute. (At 115°C* the Original Mini Ecofan 815 will move 50 CFM)

Dims: Base Plate W10 D7.5cm (4x3").
H16.5cm (6.5") from base to top of blade, excluding handle. Blade diameter 16cm (6.3")

E815BB

It is important to read and follow the instructions on the correct placement of the Ecofan to ensure satisfactory long term use and that your stove is working within the temperature range of 'best operation'. We recommend the use of our Stovetop Thermometer 14077; see page 12 for details.

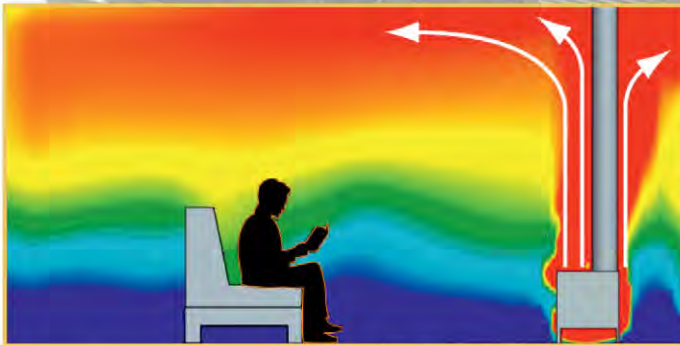

Ecofans - UK website www.ecofans.co.uk

The Caframo Ecofan is a heat-powered fan designed to circulate the warm air created by a wood or gas stove. Improved warm air circulation results in greater comfort and less fuel consumption.

Why buy a Stove Fan?

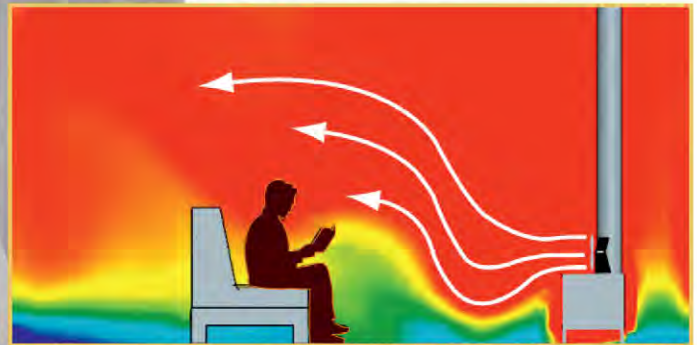

- * **Costs nothing to run...** Using the heat from the stove, a Stove Fan is the most economical way to effectively circulate the warm air your stove produces. No cables, plugs or batteries are required.
- * **Cuts your fuel bills...**
- * **Increased Efficiency...** warm air is pushed out into the living area rather than just rising to the ceiling above the stove. This improves the heating effectiveness of the stove and results in greater room comfort as shown below.

* Heat distribution without a Caframo Ecofan

* Simulation

* Heat distribution with a Caframo Ecofan

* Simulation

Reasons to buy a Genuine Caframo Ecofan

- * Caframo have two decades of experience perfecting the Ecofan. **This means lower failures and higher customer satisfaction.**
- * Caframo Ecofans are made in Canada, last longer and utilise a superior design that operates more efficiently and effectively than 3, 4 or 5 blade models.
- * More Caframo Ecofans have been sold than all other stove top fans combined.
- * Test results using AMCA testing standards prove that most air flow claims made by other stove top fan manufacturers are exaggerated, some by as much as 45%.
- * **Fully CE compliant for Immunity Emissions and Product Safety**
- * **All Caframo Ecofans are sold with a 2 year warranty.**

Caframo Ecofans are assembled in CANADA with domestic and imported parts

Caframo Ecofans fully comply with all CE Immunity Emissions and Product Safety requirements.

How to get the most from your Ecofan

Placement of your Ecofan on your stove top is critical. Be sure to position the Ecofan on the stove so that cool air will be drawn over the 'cooling fins'. The Ecofan should not be used directly in front of the stovepipe or at the front of the stove. Place the Ecofan at the back edge of the stove as shown in the diagram. Should the gap between the rear of your stove and your wall be less than 150mm (6") then move your Ecofan forward, along the side of your stove and turn it in slightly. This should ensure your fan can draw the necessary cooler air from the rear/side of your stove.

Spare Parts for Ecofans

Replacement Motor Kits are available for the Ecofans as detailed below. Unfortunately we are unable to offer for sale thermo-electric modules as their replacement is a controlled process involving strict torque settings. If you believe the module has failed you are welcome to send your Ecofan to CALFIRE who will quote you accordingly. Please note that we will only sell Ecofan spare parts for use on original Ecofans; not for any other purpose.

Motor Replacement Kits

After much usage an Ecofan motor can wear out. Motor Replacement Kits are available for customers who wish to install a new motor rather than sending the old unit back to CALFIRE for repair, or purchasing a new Ecofan. The replacement task is straight forward; however on some older models the consumer must have the capability to solder the new motor to the existing wires. The replacement kit comprises a new motor, an Allen/hex key to remove the blade and full instructions.

* To see how easy it is to change the motor on the 810 or 812 Ecofans view the video online at www.ecofan.co.uk/videos.html or scan the QR code below with your smart-phone or tablet.

Candle Powered LED Lamp

The JOI Lamp uses the same thermoelectric technology as the Ecofan to transform the energy of a tea light candle into powerful LED lighting.

The JOI Lamp is able to convert the heat of the tea light candle into more than 100 times the light generated by the candle itself.

With its telescopic extendable lamp head, the JOI allows you to create an ambient glow on your table or direct light from 430mm (17") above the housing of the unit, and everything in between.

Manufactured from Stainless Steel the JOI Lamp is supplied with a 1 year warranty.

Traditional Fire Backs - up to W61cm (24")

The thickness of our firebacks vary from ½" to 2" according to size. All firebacks are painted black.

To install simply lean the fireback against the rear of the fireplace. Some firebacks are still hand moulded and cast in much the same way as they have been for generations. Apart from the aesthetic value, firebacks prevent scorching of the rear brickwork and help to radiate heat - a point worth remembering when installing a gas log or coal effect fire as they are equally effective with this type of appliance as with the traditional natural log or coal fire.

Reeded Panels

Please note: The larger reeded panels and Fire backs featured on pages 50 - 53 are particularly heavy, therefore in the interests of Health & Safety we recommend 2/3 people are used to lift or move them.

Cross section showing Reeded form

The above wood-panelled fireplace interior is lined with cast iron Reeded Panels and a 24" Swansnest basket supported by Barley Twist Dogs.

Individual sizes & weights are provided for guidance only; due to the manufacturing process the actual product may vary.

Reeded Panels are used where the complete interior of the fireplace is required to be lined, as is the case of the re-building of a Georgian fireplace, or when reproducing a "period style fireplace".

Sizes approximate - please allow 12mm (½") tolerance. Thickness 15mm (+ / - 3mm)

Traditional Firedogs

Firedogs are used as ornamental supports for Dog Grate/Baskets. Consideration should be given to the extra width required in a fireplace opening to accommodate the feet span of the dogs.

Cast Iron Dogs can, if preferred be used without a Dog Basket. Seasoned logs can be lent against the cross bars and burnt on the hearth base, providing there is a good draw in the chimney.

All Firedogs sold as pairs

Bauhaus

With the Bauhaus Fret choose a black finish for use with solid fuel as polished surfaces change colour with heat. Polished surfaces can also be affected by the heat from gas appliances although the resultant discolouration will be much less noticeable.

British Club Fenders - Key: BB = Brass Backs fitted as standard. MES = Minimum extending size possible.

Antique Brass & Satin Chrome finishes now available or any combination i.e. Black & Satin Chrome

Spiral Black

Illustrated seat colour is Burgundy, with a black finish
Made to measure only, (122cm) 4' minimum width.
3 row 'deep' buttons as standard.
Seat size shown approx 16.5x52cm (W6.5"H20.5")

Incorporating the finest quality hide with close attention to detail, the Club range offers the perfect solution for an exclusive fireside setting. With a range of seat covers including Burgundy, Antique Green, Antique Red, Burnt Copper, Earth Brown, Ocean Blue and Black. Seat styles can be varied to suit personal requirements with models illustrated depicting standard seat designs. For reasons of stability, we recommend a minimum base return of 12"(30cm). We will be pleased to provide a quotation for special sizes and configurations which can be manufactured to your requirements. Optional Brass Backs are available on all models, with the exception of the Regal Club and Spiral Black but are fitted as standard on the Canterbury.

Majestic

Illustrated seat colour is Ocean Blue, with a Brass finish.
MES (122x152.5cm) 4/5' .3 row 'float' buttons as standard.

Welcome to the CALFIRE FIRESIDE COLLECTION.

CALFIRE is a long established family group of companies with a strong reputation for quality products and service throughout the heating and fireplace industry. Friendly and approachable, CALFIRE prides itself on customer service.

In November 2010 CALFIRE took over the supply and distribution of the exceptional Kingsworthy Foundry range of fireside accessories for log and coal burning fires. As a result CALFIRE now offer the most comprehensive range of quality cast iron firebacks, firebaskets, swansnest baskets, ducksnest baskets, firedogs and reeded panels together with superb quality British Made steel firebaskets and blacksmith produced firedogs.

CALFIRE are unique within the fireplace and heating industry with their extensive product related ranges. In addition to offering a most comprehensive selection of Fireside Accessories they are also:

- ✎ The official UK distributor for StoveBright® High-Temperature Paint, selling the product in aerosol and touch-up forms to retailers as well as in bulk liquid form to many of the leading UK traditional Woodburning Stove Manufacturers. Visit the UK specific StoveBright® website at www.stovebright.co.uk for full information.
- ✎ The official UK distributor for Ecofans®. These products sit on the top of woodburning stoves and assist in distributing the stoves heat without using mains or battery power. Improved warm air circulation results in greater comfort and less fuel consumption. Ecofans® are a great favourite with the countries many Narrow Boat enthusiasts. Visit the UK specific Ecofan® website at www.ecofan.co.uk for full information.
- ✎ A major supplier of Replacement Stove Glass offering Schott Robax Ceramic Glass panels, Borofloat Strips as well as Mica. All popular sizes are available 'off the shelf' with in house facilities available for cutting your special requirements.

Terms & Conditions of Sale

1 GENERAL

These conditions shall apply to all of our quotations and all contracts, and orders for the sale of goods accepted by us. Any other terms, conditions, warranties or representations, whether made prior to collateral with, or subsequent to the contract or order, are hereby excluded. Special or additional terms of the purchaser contained in his order or otherwise shall be of no effect unless the same be separately brought to our notice and express consent thereto is given in our written acceptance.

2 DOCUMENTS

- a) All literature, illustrations, drawings, specifications, weights, measure, technical data, estimates of performance that we supply have been prepared by the Manufacturers of the goods and accordingly we cannot accept any liability for any inaccuracy, omission, variation of any kind or for any loss howsoever caused arising out of the supply of such and they shall not form part of any contract or be binding in any way.
- b) We reserve the right at any time to correct clerical or technical errors in the contract documents.
- c) The purchaser shall furnish us with all necessary specifications with the order. We take no responsibility for goods manufactured, price, or delivery not in accordance with the order or the specification or any requirements of any Government or other inspecting authority. It is the purchaser's duty to check that any technical information supplied by us and any particulars included in our acknowledgment confirming those specifications are correctly set out.

3 PRICES

Quotations only refer to goods and articles specified therein and available at the time of quotation. All selling prices contained in the quotation are ex-works except where expressly altered within the quotation, are net and exclude VAT and are those ruling at the date of quotation. They are provisional only and are subject to revision by us at any time without notice before the goods are despatched to take into account of subsequent variations in the cost of materials, labour, awards or increases in overhead cost. Prices may also be revised where the purchaser calls down quantities smaller than those specified in his order. The purchaser shall pay the price as so revised. VAT shall be charged at the appropriate rate in force at the time of invoicing.

4 TERMS OF PAYMENT

- a) Unless otherwise stipulated on our invoice, all accounts are strictly net monthly account.
 - b) Where the contract is to be or may be fulfilled in separate installments, deliveries or parts, payment for such installment, delivery or part shall be made under sub-clause (a) hereof as if the same constituted a separate contract.
 - c) Should the purchaser fail punctually with the terms of payment, we shall be entitled to charge interest on any overdue account at the rate of 2½% over and above the Midland Bank Base rate charged per month.
- ### 5 TITLE
- a) Title to the product shall not pass to the purchaser until payment has been received in full by us of (i) the price thereof and (ii) all other sums owing to us.
 - b) Until payment of all such sums, the purchaser shall hold the products as agent for us and shall store them on his premises separately from his own goods or those of any other person and in a manner, which makes them readily identifiable as our goods.
 - c) The purchaser may sell the goods as agent and bailee for us, but as against any third party the sale by the purchaser shall be as in principal such of the proceeds of any sale as is equal to the price to the purchaser of the goods shall be held in trust for us and shall not be mingled with any other monies or paid into an overdrawn bank account and shall at all times be identifiable as our money.
 - d) If the goods are admixed, consumed, converted or otherwise become constituents of other goods the property of the purchaser before payment has been received by us and before title to the goods has passed to the purchaser, the goods, including all of any such other goods, shall be the property of us and the purchaser declares itself a trustee of such goods for us until such payment is made in full to us and the purchaser shall hold such goods and the entire proceeds of sale and any rights arising from the sale thereof as trustee for us.
 - e) If at any time before title of the goods shall have passed to the purchaser we may, for the purpose of recovery of the goods, enter upon any premises where the goods are stored, or where they are reasonably thought to be stored, and may repossess them and the purchaser grants us such licences as may be necessary for the purpose of entry to any premises of the purchaser.

6 TIME OF DESPATCH

All periods for despatch and delivery expressed in the contract are approximate only. We use all reasonable endeavours to effect despatches within the stipulated period, or if no such period be stipulated, within a reasonable amount of time. However, we shall be under no liability for any loss or damage to the purchaser or others arising directly or indirectly out of late despatch or delivery, whether due to our default or not, nor shall such late despatch or delivery be deemed to be breach of contract, nor entitle the purchaser to cancel the contract.

7 DELIVERY

- a) When delivery is effected on our vehicles or by an independent contractor arranged by us, the purchaser having had prior notification, shall be bound to accept delivery of the goods on arrival at his works, when sole risk in the goods shall pass to the purchaser. Where payment in full has not been received the purchaser as agents shall, on delivery, insure and keep fully insured the goods against all and every risk, including specifically but without prejudice to the generality of the foregoing damage by the purchaser or third parties, fires, explosion, aircraft, theft, tempest and flood; and the purchaser shall also be responsible for the maintenance and care of the goods and, in addition to indemnifying us against any depreciation in the value of the goods, shall also indemnify us against any damage caused to the goods should payment in full not be made.
- b) The purchaser to notify us and the carrier in writing (otherwise than upon the carrier's documents), of any damage in transit, mis-delivery, or quantity discrepancy immediately on arrival. The purchaser must notify us and their carrier in writing (otherwise than on the carrier's documents) of any non-delivery within 5 working days where delivery is effected through the post, by road or British Rail, and 2 working days where delivery is effected on our own vehicles; in all cases from the date of despatch advised to the purchaser.
- c) Where delivery is effected on the purchaser's vehicle or is arranged by him, risk in the goods shall pass to the purchaser on delivery to the carrier, whether he be the purchaser's servant or agent or an independent contractor arranged by the purchaser.
- d) Without prejudice to our other rights, should the purchaser for any reason fail to accept delivery of the goods on arrival (prior notification having been made) then, at the entire risk and expenses of the purchaser, we shall be entitled to store the goods and/or to procure or effect storage of goods elsewhere and we shall further be entitled to be paid by the purchaser for the cost of re-delivery and storage of goods.
- e) To stop any delivery (prior notification having been made) the purchaser must give in writing 7 working days notice.

8 RETURNED GOODS

We cannot accept the return of goods already delivered to the purchaser otherwise than pursuant to clause 7 (c) hereof or by special arrangement, and then subject to the appropriate restocking charge which shall not be less than 10% of the net invoice value.

9 INDEMNITY

The purchaser shall indemnify us against all actions, claims, demands, penalties and cost by third parties in tort, or for infringement or alleged infringements of patents or registered designs or otherwise arising in connection with the goods or their delivery or unloading or with work done by us in accordance with the purchasers specifications.

10 EXCLUSION OF LIABILITY

We are hereby expressly excluded from any liability howsoever arising in respect of any express or implied condition, statement, representation or warranty, statutory or otherwise relating to any goods supplied by us. However, without prejudice to the foregoing, we are prepared to assist in the execution of any Manufacturer's warranties and guarantees.

11 INSOLVENCY

If the purchaser shall make default in, or commit any breach of, any of his obligations to us (whether under this agreement or otherwise), or wrongfully stop payment of any debt, or is deemed to be unable to pay its debts within the meaning of such Insolvency Act as shall be current at the date of the contract, and if any distress or execution should be levied upon the purchaser, his property or assets, or if the purchaser shall make or offer to make any arrangements or composition with creditors to commit any act of bankruptcy, or if any petition or receiving order in bankruptcy shall be presented or made against the purchaser, or if the purchaser shall be a limited company and any resolution or petition to wind up such company's business shall be passed or presented (otherwise than for reconstruction or amalgamation only), or if a receiver of such company's undertaking property or assets or any part thereof shall be appointed then in any such case we shall have the right forthwith to determine the contract in whole or in part by notice in writing to the purchaser and repossess any of the goods of which title has not passed to the purchaser pursuant to condition 5 hereof.

12 MISCELLANEOUS

- a) The granting of this, or the neglect or forbearance on the part of us in enforcing any of these conditions, shall neither be nor be deemed to be, a waiver or in any way prejudice any right of us under these conditions.
- b) If any term, paragraph or provision of these conditions shall be held to be invalid or unenforceable for whatever reason, such invalidity or unenforceability shall not affect the operation of any other term, paragraph or provision.
- c) This contract applies to further purchases that the purchaser makes and shall be govern in accordance with the laws of England and we and the purchaser both submit to the jurisdiction of the English courts.
- e) If any part of this contract shall be rendered invalid by operation of law then, to the extent allowed by law, the remainder of this contract shall remain in force and such part of this contract as has been rendered inoperable shall be deemed to be replaced by a clause of similar nature and effect but to the extent allowed by law.
